

Refrigeration throughout the whole supply chain

Daikin is a strong challenger in the refrigeration market. We can create the ideal solution for each customer's specific situation.

As our products contain the latest technologies we ensure the highest energy efficiency. Our units are rigorously tested in order to provide you reliable operation.

With the acquisition of the Zanotti, Tewis and AHT groups, we expand our refrigeration business providing a larger and more diverse product line for all aspects in the cold chain.

Any refrigeration system that contains fluorinated greenhouse gases is in scope of the F-gas regulations.

For fully/partially pre-charged equipment: contains fluorinated greenhouse gases. Actual refrigerant charge depends on the final unit construction, details can be found on the unit labels.

For non pre-charged equipment (including, but not limited to racks): its functioning relies on fluorinated greenhouse gases.

The F-gas regulations do not apply to systems that contain only natural refrigerants such as propane (R-290) and carbon dioxide (R-744).

Refrigerant	GWP AR4	GWP AR5
R-134A	1,430	1,300
R-407C	1,774	1,620
R-407F	1,825	1,670
R-407H	1,490	1,380

Cold Chain Expertise

From production to delivery

Reshaping the future of cold chain supply

Combining refrigeration expertise with innovative technology, Daikin's comprehensive product portfolio delivers integrated temperature control solutions that improve quality and safety through every link in the distribution process from point of origin to the final consumer. Our range of products and services provide the flexibility to meet diverse customer needs across a range of applications, during production, storage, retail and transit. Energy-efficient technologies with low-GWP refrigerants provide reliable and cost-effective operation, safeguarding perishable supplies, whatever the climate, while protecting the environment.

We will leverage our strengths **to cover the entire cold chain.**

Vision 2050

Daikin Environmental Policy

Adopted in 2015, the Paris Agreement contains a target for the latter half of this century of reducing greenhouse gas emissions to net zero and limiting global warming by less than 2°C compared to pre-industrial levels. In the spirit of the Paris Agreement, Daikin has formulated Environmental Vision 2050, with a target of reducing greenhouse gas emissions to net zero by 2050. We have established a reduction target for 2030 and incorporated this into our efforts under the Fusion 25 Strategic Management Plan.

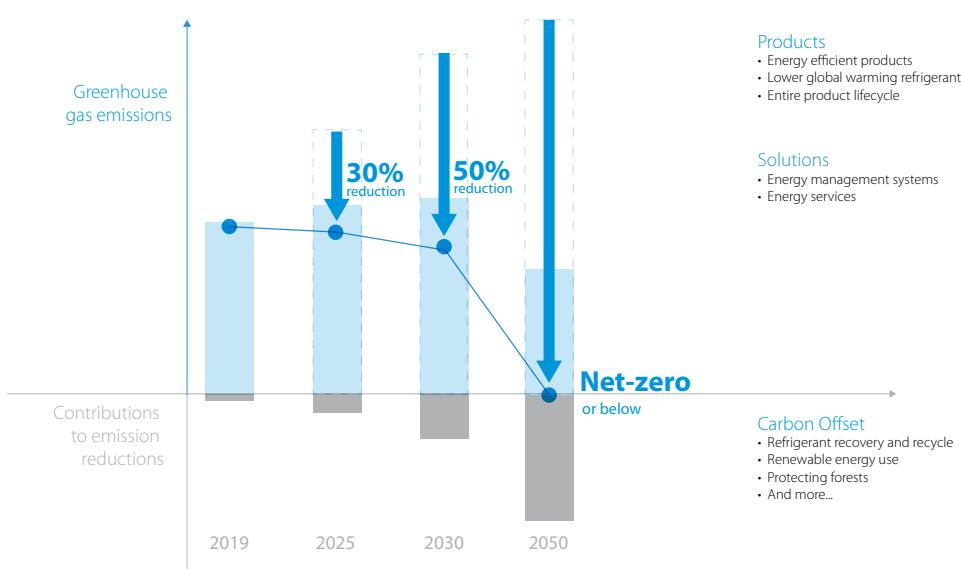

Our Vision 2050

We will reduce the greenhouse gas emissions generated throughout the entire lifecycle of our products by 2050. Furthermore, we are committed to creating solutions that link society and customers as we work with stakeholders to reduce greenhouse gas emissions to net zero. Using IoT and AI, and open innovation attempts, we will meet the world's needs for air solutions by providing safe and healthy air environments while at the same time contributing to solving global environmental problems.

Refrigeration Medium-Term Outlook

In our Cold Chain business, we are moving towards low-GWP and HFC-free natural refrigerants, while ensuring the correct safety standards are established in our markets. We maintain continuous focus on reducing the energy consumption of all our products. In the Transport Refrigeration industry, we will strive to lead the shift towards electrification and phase-down the reliance on combustion engine technologies.

Net-zero product lifecycle

Why choose Daikin?

We know refrigeration inside out

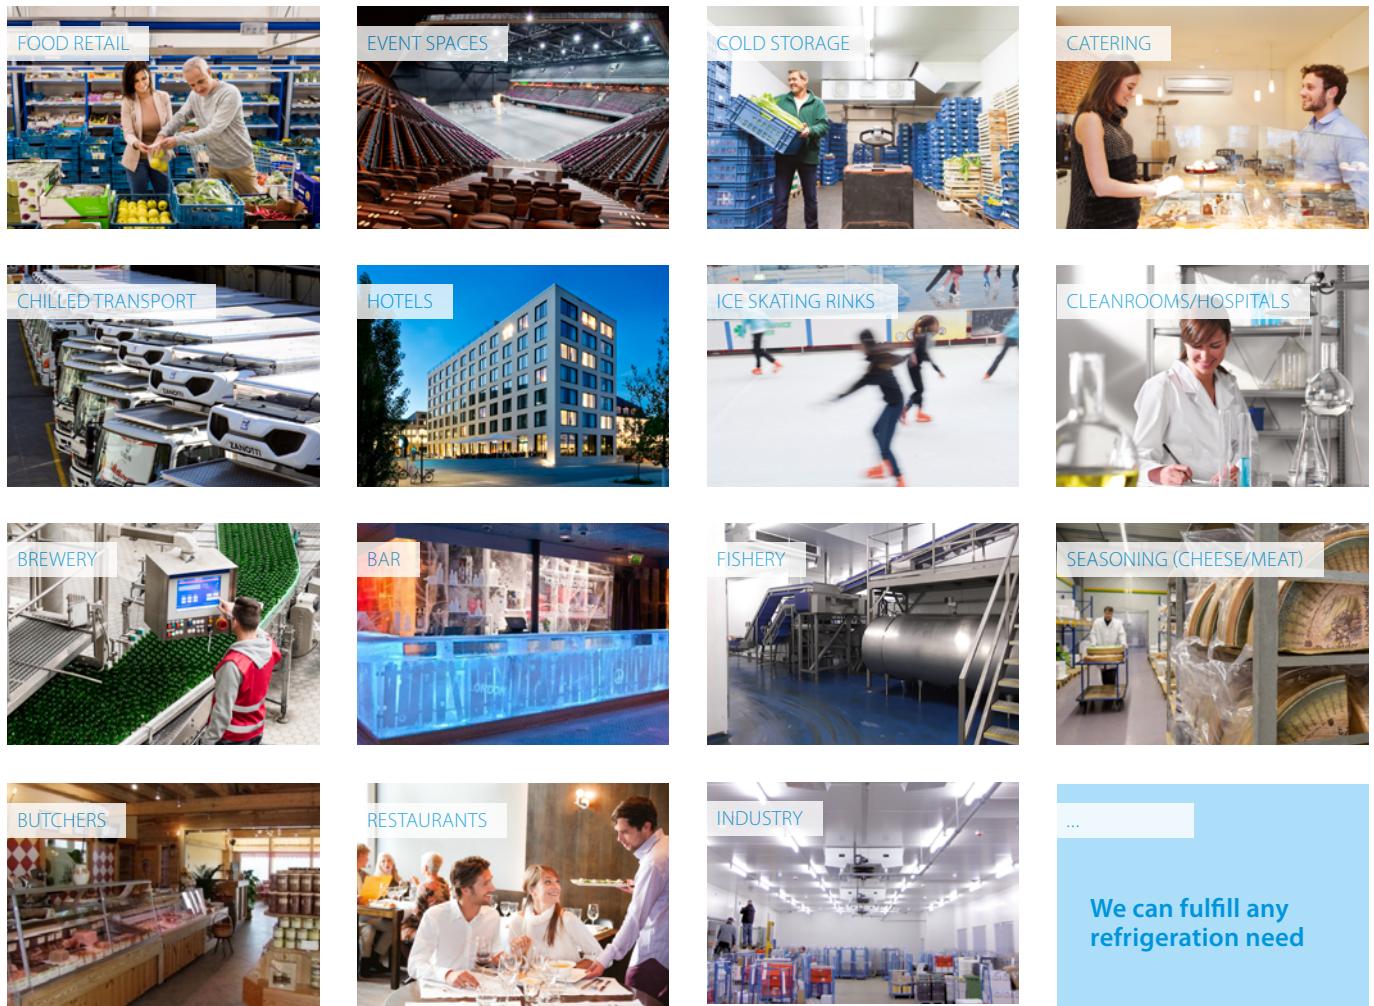

- We have over 100 years of experience in the Refrigeration business.
- We can meet all refrigeration needs from farm to fork, thanks to our wide range of refrigeration products.
- Innovative and reliable own technology and expertise on refrigerants, controls and compressors!
- Your advisor for solutions to meet your needs in line with legislation (F-gas regulation, ecodesign,...) and with focus on reliability, safety, Total Equivalent Warming Impact (see page 7) and running cost.

Controlled temperatures throughout the whole supply chain

We can meet all refrigeration needs from farm to fork

Our extended product line-up is able to provide solutions for:

Daikin Refrigeration – United in cold

Hubbard Products Ltd., is one of the UK's leading designers, manufacturers and suppliers of commercial cooling equipment and has earned an enviable Global reputation for innovation and design-led excellence.

Daikin Europe N.V. is a major European producer of air conditioners, heating systems and refrigeration equipment, with approximately 5,500 employees throughout Europe and major manufacturing facilities based in Belgium, the Czech Republic, Germany, Italy, Turkey and the UK. Globally, Daikin is renowned for its pioneering approach to product development and the unrivalled quality and versatility of its integrated solutions.

AHT develops, manufactures and sells refrigerating and freezing showcases specifically suited for food retailers. Leading the "plug-in" type showcases segment, AHT leads the market by the active launch of new products corresponding to evolving store layouts. Furthermore, utilizing its technological capabilities and business resources, AHT serves large accounts which include major food retail chains worldwide.

Tewis is a leading company in the design and engineering of refrigeration systems. Along with their expertise in customising controls (including monitoring), Tewis offers total comprehensive solutions for Refrigeration and Climate applications. Over the last few years, Tewis has focused on developing a range of CO₂ based refrigeration systems and has established a long-lasting relationship with key Spanish and Portuguese food retailers. Its mission and philosophy to date has been to achieve high reliability and realise remarkable energy savings for their customer base.

Daikin Chemicals

Daikin Chemicals is one of the world's foremost manufacturer of fluorochemical products and is a leading expert in that field. We strive to find new possibilities for living and industry by making the most of fluorine characteristics using our own exclusively developed technologies.

Zanotti is a refrigeration specialist founded in 1962. With over 50 years of experience in food storing services covering the needs of commercial and industrial refrigeration, but also the needs of the transportation of fresh and frozen products. Zanotti changed the refrigeration world from the early days with the introduction of the Uniblock, an all in one plug and play refrigeration unit for cold rooms. Today they employ more than 600 people, with three production facilities and an annual turnover of approx 130 million Euro.

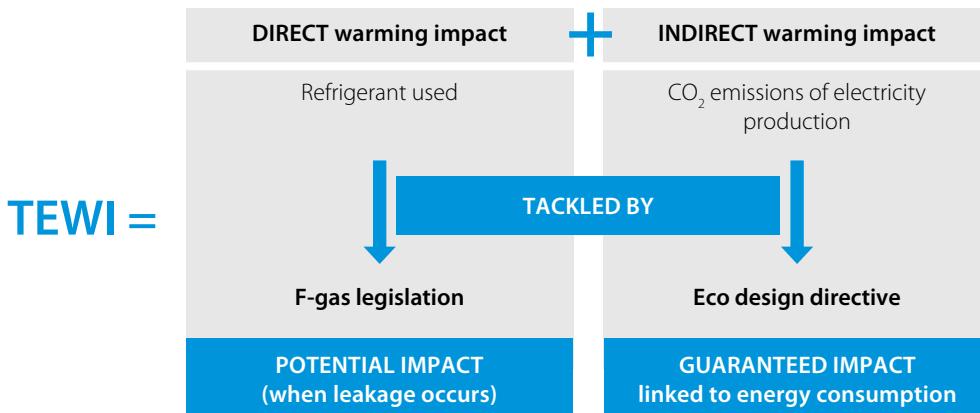

Meeting customer needs!

Depending on type of application, location and customers interest/values, the optimal refrigeration solution for the customer can potentially be different! **Thanks to our wide product portfolio, Daikin can offer what a customer really needs!**

The DNA of our Advice is:

- Safety and Reliability
- Reducing the Total Equivalent Warming Impact (TEWI)

Reduction of CO₂ emissions is one of the main priorities for the future. A refrigeration plant's global warming effect is the combination of the possible refrigerant losses (Direct warming impact) and the CO₂ emissions caused by electricity production (Indirect warming impact). Country per country situation is different, however on average in Europe CO₂ release at energy production is quite high (average 0.45kg/kwh of Electrical Energy)! Due to this, there is a significant greenhouse effect over the lifetime of the refrigeration plant and efficiency is thus one of the crucial focus points in reducing TEWI! When various refrigeration solutions are being compared it is thus important to take into account both aspects as in some cases optimizing the direct warming impact (eg: changing refrigerant) will have an opposite effect on the indirect warming impact!

- Reducing your running cost

Through focus on reliability & quality, through extensive testing on each product, and energy efficiency our aim is to reduce your operational cost to the absolute minimum!

Plug and Play solutions
for cold rooms and wine rooms

Zanotti

Touch control

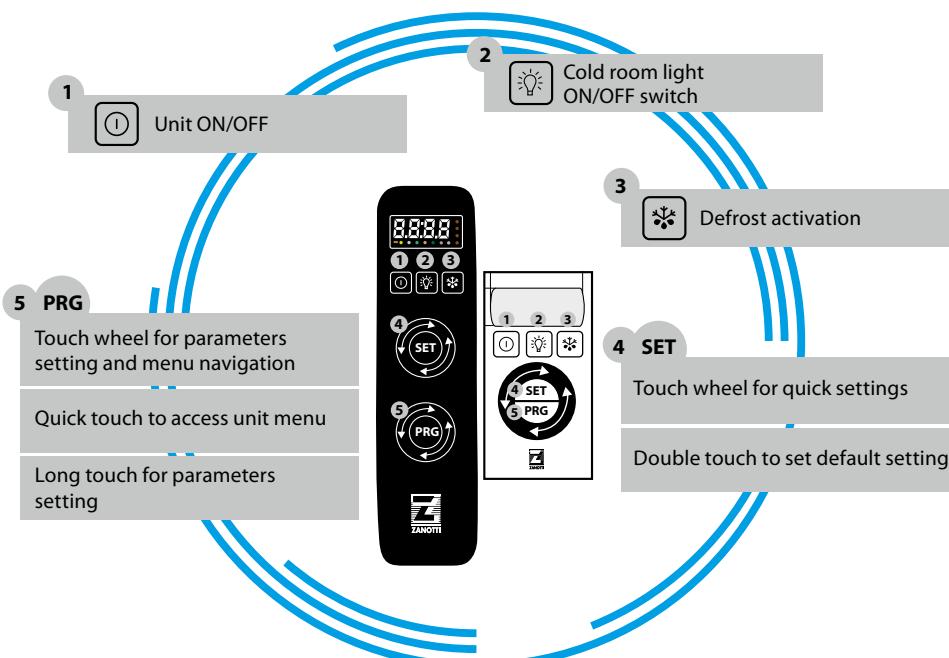

Zanotti presents the new "Touch Screen" control panel for GM monobloc units and GS split units. This new one User interface consists of keypad and display and allows easy access to all manual functions of the units.

The control of the refrigeration cycle, switching the unit on and off, the lighting in the cold room, activating the manual defrost process and setting the parameters are the features that are more intuitive with the new keyboard.

GM Monoblock Unit

GS Split Unit

for two units in a cold storage cell ALTERNATIVE REMOTE CONTROL

- For cold rooms where it is required by law to maintain a certain temperature (Products for hospitals, Pharmaceutical products) for safety and control it is necessary to install 2 units in the same cold room, so that they can always be working in alternate hours - when one is off, the other unit is working.
- If an aggregate in full function gets blocked, the second aggregate starts automatically. When the temperature for remote controls with thermostat is not achieved for a certain period of time (product feed, open cell door for longer period of time,...), the unit changes into the standby function.

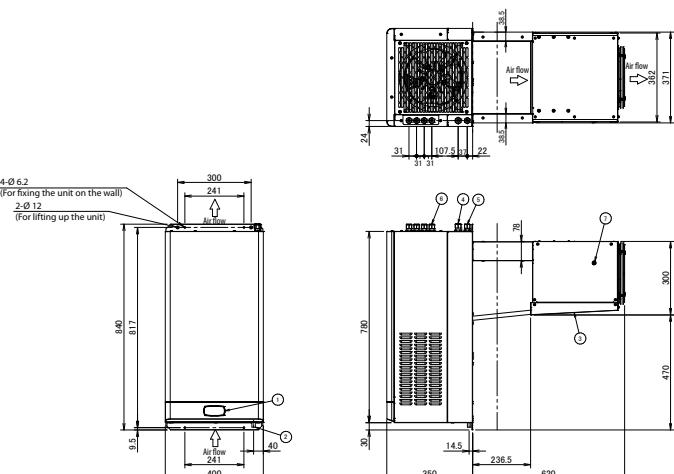

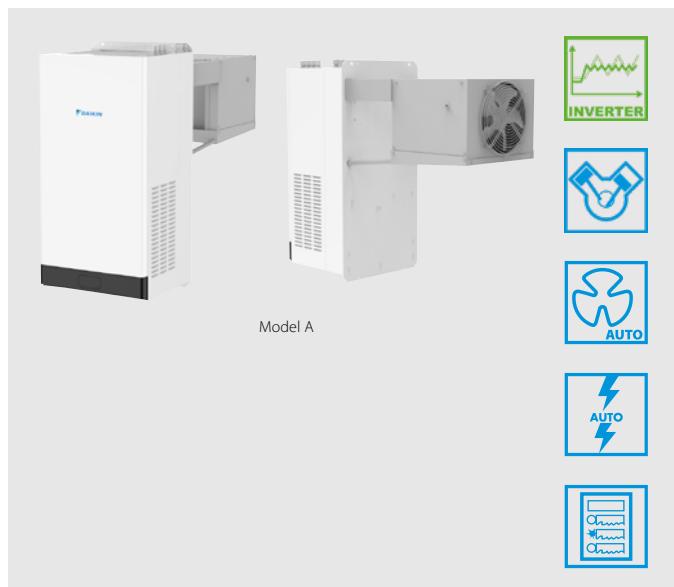

- Remote control for two aggregates.
- Adjustable timer for alternate operation.
- In case of device failure of one the refrigeration units, the control can be switched on the other unit nearby. Alarm message through Lamp and buzzer.
- Thermostat for Safety at high Temperatures in the cold room (only with models with Thermostat).

For customized options, please contact your sales representative.

Inverter Monoblock for Refrigeration | Model A

Standard equipment

- › Inverter driven hermetic reciprocating compressor
 - › 50/60 Hz power supply
 - ›  certified
 - › Microchannel condenser
 - › Filter dryer
 - › Condenser fan ON/OFF controlled by temperature probe
 - › Electronic thermal expansion valve
 - › Condensate evaporation tray
 - › Hot gas defrost
 - › Propane refrigerant charge => 150gr
 - › Electronic control board
 - › Electrical switchboard with protection fuses
 - › Fixed calibration HP switch with automatic reset
 - › Automatic elimination of condensation water
 - › 5 m cable for power supply
 - › 2 m cold room lighting cable (Light bulb and bulb as option)
 - › 5 m micro-switch door cable (Microswitch as option)
 - › 5 m cable for door heater

Monoblock units suitable for container

Main Characteristics

- › Hermetic compressor
- › Outdoor installation frame
- › Power supply 220-230/1N~/50 or 380-400/3N~/50
- › Ari + Axial fan
- › Condenser fan pressure switch (frame 1, 2, 3 only)
- › Condenser fan pressure controlled fan speed regulator (frame 4, 5, 6 only)
- › Prearrangement for supervision system (frame 4, 5, 6 only)
- › Voltage monitor (frame 4, 5, 6 only)
- › Filter dryer on liquid line
- › Four-pole condenser fan
- › Expansion through capillary tube (expansion valve only in dual-temperature units)
- › Separator/accumulator on suction line
- › Condensate water evaporation drip tray
- › Hot gas defrost
- › Refrigerant charge
- › Electronic controller
- › Switchboard with protection fuses
- › Condenser fan pressure switch
- › Adjustable Lp switch with automatic reset
- › Adjustable Hp switch with automatic reset
- › 100mm insulated panel for wall mounting
- › Crankcase heater
- › Double defrost solenoid valve
- › External power supply plug
- › 1m cold room lighting cable
- › 3m door micro-switch cable
- › Cataphoresis for condenser coil
- › Cataphoresis for evaporator coil

Monoblock units suitable for medium-large size cold rooms and freezing tunnels

Extreme versatility of use, suitable for freezing tunnels

The RS series models are monoblock units characterized by extreme versatility of use, ideal for medium-large rooms.

- › Extreme versatility of use, low-medium temperatures, polyvalent temperatures and freezing tunnels
- › Suitable for different types of applications
- › Compact and highly resistant to any environmental condition
- › Solenoid valve and thermostatic valve for high efficiency
- › Control panel with electromechanical instrumentation for controlling all the functionalities of the machine

Monoblock system for low and medium temperature refrigeration

For wall mounted installation in small and medium sized cold rooms

- › Rapid mounting on the wall of the cold room by straddle-mounting, which is ideal for new installations or through-wall mounting and refurbishment projects
- › Metallic grey coloured finish of the outdoor unit
- › The white colour of the evaporator blends unobtrusively with the cold room walls
- › Compressor compartment insulated with suitable soundproofing material to reduce sound levels
- › Microchannel condensers available in order to reduce the refrigerant charge as much as possible and ensuring higher energy efficiency
- › The units are provided with a new generation control panel with an easy-to-use interface

Monoblock system for low and medium temperature refrigeration

For roof mounted installation in small and medium sized cold rooms

- › Rapid mounting on the roof of the cold room
- › Ceiling assembly leaves the space inside the cold room completely free
- › The white colour of the evaporator blends unobtrusively with the cold room walls
- › Extremely fast to assemble, reducing installation time and cost
- › Best surface-to-capacity ratio
- › Remote electronic command station with easy-to-use user interface programmable according to various system requirements

Installation type

Refrigeration split type units designed for use in small to medium rooms

Condensing unit for wall mounted installation

- › Wide versatility of installation of condensing part and evaporating part
- › Condensing part body with metallic grey finishing
- › The white color of the evaporator part blends discreetly with the walls of the cold room
- › Compressor compartment is ready to be insulated with suitable sound-absorbing material to reduce noise levels
- › Micro-channel condensers available to reduce the refrigerant charge as much as possible and ensure higher energy efficiency

Monoblock units for wine application

Monoblock system suitable for through-wall installation

- › Accurate humidity and temperature control to guarantee the quality of products (e.g. wines)
- › Integrated humidifier available depending on model to have one unit which covers it all: perfect humidity & temperature control
- › Electronic controller managing both temperature and humidity of the cold room

Installation type

More details and final information can be found by scanning or clicking the QR codes.

Drying and ageing units

Monoblock and bi-block units for drying and ageing of meat and cheese

For small and medium size coldrooms

- › Quick and easy installation
 - › Low noise and vibration
 - › Electronic control
 - › Constant and detailed control of temperature and humidity level during operation
 - › Compact and functional, with removable panels to allow easy access to internal components
 - › More units available suitable for large coldrooms

SAS: Drying and ageing units for small and medium cold rooms

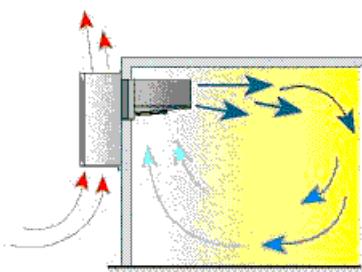

- › Coldroom temperature: +10°C to +25°C
 - › Humidity: till 60%

SAR: Units for post-salting resting of hams for small and medium cold rooms

- › Coldroom temperature: +2°C to +4°C
 - › Humidity: till 40%

Cooling capacity:

- › from 2,900 to 15,900 Watt

Air Handling Units for industrial drying

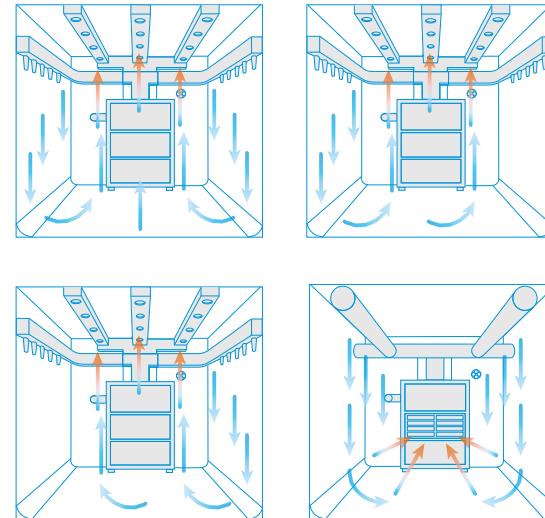

Main Characteristics

- › Frascold semihermetic compressor + Thermal overload protection
- › Power supply 380-400/3N~/50
- › Air + Axial fan (remote)
- › Embedded main electrical switchboard and remote control panel with Vision Touch controller + switch to select static/ventilated evaporator
- › Hot gas defrost
- › Magnetothermal switches
- › Liquid line predisposition for connection to static evaporators
- › Cataphoresis to the evaporator and heat recovery coil
- › Remote air cooled condenser
- › Soft start on centrifugal fan (starting from 15HP unit)
- › Liquid Receiver + Liquid receiver shut off valves
- › Safety valve
- › Filter dryer
- › Sight glass
- › Four-pole condenser fan
- › Thermostatic valve expansion
- › Evaporator centrifugal fan
- › Air suction duct
- › Condensing unit with refrigerant charge
- › Switchboard with automatic switches
- › Adjustable calibration Hp switch with manual reset
- › Adjustable calibration Lp switch with automatic reset
- › Pressure controlled condenser fan speed regulator
- › Humidity control during dehumidification with heat recovery
- › Temperature control in hot with electric heaters
- › Humidity control in humidification with automatic water supply
- › Crankcase heater
- › Fresh air intake
- › Evaporator/heat recovery coil Copper/Aluminium with cataphoresis treatment
- › Heat recovery coil + heating with electrical heaters
- › Embedded main switchboard and remote control panel with Vision Touch Controller

Air distribution systems with textile channels

The UAV industrial drying units are equipped with large and efficient evaporators with centrifugal fan, capable of generating air flow from 1,500 to 14,600m³/h. This allows, thanks to the special galvanized sheet T-shaped ducts designed according to the room dimensions, an optimized distribution of the treated air in the room suitable for the required process. The T-shaped ducts are complete with motorized damper.

Condensing units

Condensing unit for commercial refrigeration with reciprocating technology

Refrigeration solution for small food retailers

- › Designed specifically for small capacity refrigeration applications in small food stores (eg. in bakeries and butchers), cold rooms, bottle coolers and display cabinets
 - › Compact and lightweight for even the smallest of city centre locations
 - › All components can be accessed, making maintenance quick and easy
 - › Ideal for urban applications: sound proofing and low operating sound levels mean the unit is quiet
 - › The optimised compressor range and increased condenser surface deliver high levels of energy efficiency and reliability is ensured by using high quality components and production processes
 - › Micro channel heat exchanger technology reduces the amount of refrigerant used in the system, lowering environmental impact

JEHCCU-CM1/CM3

JFHCCU-CM3

JFHCCU-CM1

More details and final information can be found by scanning or clicking the QR codes.

(1) Refer to condition: Outside ambient temperature = 32°C, Evaporation temperature = -10°C and Return Gas 20°C (medium temperature application) | (2) Average sound pressure level is measured at 10m in anechoic room

Condensing unit for commercial refrigeration with scroll technology

Refrigeration solution for small food retailers

- Designed specifically for small capacity refrigeration applications in small food stores (eg. in bakeries and butchers), cold rooms, bottle coolers and display cabinets
- Compact and lightweight for even the smallest of city centre locations
- All components can be accessed, making maintenance quick and easy
- Ideal for urban applications: sound proofing and low operating sound levels mean the unit is quiet
- The optimised compressor range and increased condenser surface deliver high levels of energy efficiency and reliability is ensured by using high quality components and production processes
- Micro channel heat exchanger technology reduces the amount of refrigerant used in the system, lowering environmental impact

Condensing unit for commercial refrigeration with scroll / reciprocating technology

Refrigeration solution for small food retailers

- Designed specifically for small capacity refrigeration applications in small food stores (eg. in bakeries and butchers), cold rooms, bottle coolers and display cabinets
- Compact and lightweight for even the smallest of city centre locations
- All components can be accessed, making maintenance quick and easy
- Ideal for urban applications: sound proofing and low operating sound levels mean the unit is quiet
- The optimised compressor range and increased condenser surface deliver high levels of energy efficiency and reliability is ensured by using high quality components and production processes
- Micro channel heat exchanger technology reduces the amount of refrigerant used in the system, lowering environmental impact

1) Refer to condition: Outside ambient temperature = 32°C, Evaporation temperature = -35°C and Return Gas 20°C (low temperature application) | (2) Average sound pressure level is measured at 10m in anechoic room |

* Condition with high discharge temperature

Condensing units with inverter driven compressor

High reliability, low cost and easy installation

- › Power supply 380-400/3N~/50
- › Pressure controlled fan speed controller
- › Crankcase heater
- › Oil separator
- › Power control box with magnetothermic switches + thermal protection + electronic controller
- › Inverter
- › Oil separator + condenser fans speed regulator with pressure probe
- › Liquid receiver with safety valve + liquid line
- › HP + LP pressure switches, Crankcase heater
- › Antivibration eliminators on suction and discharge line
- › Condenser with 6 poles axial fans
- › Condensing unit under nitrogen pressure
- › Muffler on discharge line
- › Residential Soundproofing

- › Electrical box: power control box with thermal protection and capacity regulation
- › Soundproofing: double noise insulation (residential)

ZEAS condensing unit for medium and low temperature refrigeration

Why choose ZEAS?

Whether it is restaurants, supermarkets or event halls – Zeas from Daikin is as individual as the requirements of the industries where it is used.

High energy efficiency

- › Daikin DC inverter scroll compressor with economizer technology
- › DC inverter fan technology
- › Eco-design compliant

BENEFITS

› Lower energy bills

The use of Daikin proven DC technology results in lower energy bill compared to the use of standard ON/OFF units and even other capacity controller refrigeration units

› Our units are future proof

Combining Daikin innovating economizer technology with in house DC technology results in very high efficient units allowing us to outperformed the most severe eco-design minimum performance for the coming decades

Reliable operation

- › Zeas condensing units are rigorously tested on the assembly line
- › Proven inverter scroll technology
- › Proven onboard innovating economizer technology
- › Anti-corrosion treatment on the housing ensures long life even in extreme conditions

BENEFITS

› Optimal food conservation

Accurate temperature and humidity control can be easily suited to the requirements for different foods and beverages resulting in less waste of precious products

› Longer lifetime expectation of our compressor

Less thermal stress on our bearings and motor windings due to the implementation of Daikin High quality DC technology in our compressor

› Longer lifetime expectations of our units

The use of our innovating economizer technology in our units guarantee that our the compressor always operates within his operating envelop even in the most harvest conditions: excessive superheat at the inlet of the compressor resulting from improper quality of installation on the refrigerated cabinets side

› No leaks

Each new Daikin designed unit is put on a vibration plate in the factory to be sure that no leak and component damage can occur during transport. Even further, in the assemble line the Zeas unit undergo several leak test

› No "dead on arrival"

ALL units leaving the factory, have already run at the end of the assembly line

› Lower installation cost

Due to the use of the onboard economizer technology and the use of the correct low GWP refrigerant we only required the use of smaller pipes compared to other traditional systems, thus also lowered the refrigerant charge of the system

Small foot print and low weight

- › Extremely compact and space-saving design
- › Easy to install, even in the smallest spaces
- › Indoor installation possible
- › Best surface to capacity ration on the market
- › Low weight thanks to compact design

BENEFITS

- › Only light weight supporting structures are required

- › No installation restrictions anymore

Our mini Zeas due to his compact design, light weight and very silent operation can be installed everywhere!

- › No special crane are required

The ZEAS units are so compact that it can fit in an elevator

Peace of mind

- › Quiet operation, unobtrusive for customers and neighbours
 - High grade sound on panels and compressors
 - Condenser fans designed to limit the noise
 - 4 low noise operation settings including night mode
- › Wide temperature range allows multiple cabinet, freezer and cold room combinations

BENEFITS

- › Happy neighbours

- and no installation restrictions anymore

The focus on sound criteria during the design of the units results in the most silent unit(s) of the market (till 25 dB(A) @ 10 m free field conditions)

Intelligent control

- › Unit can be connected to third party monitoring system
- › Remote control of target evaporation temperature, reset errors and other functions
- › Refrigeration unit can be controlled remotely through a power full interface

BENEFITS

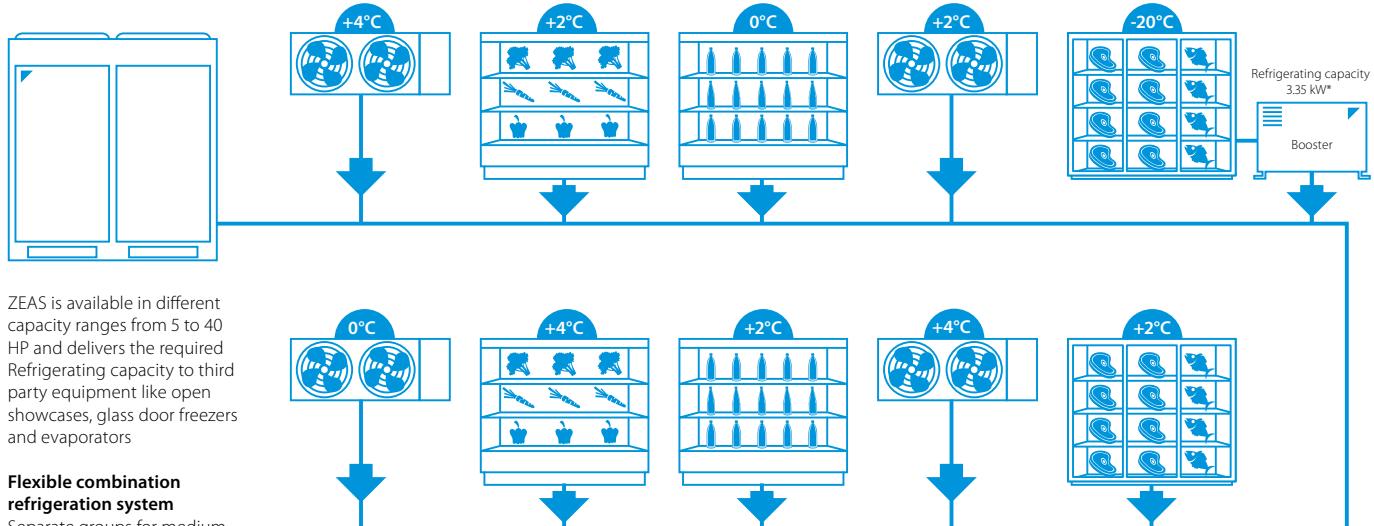

- › Quick installation and commissioning

Advanced software solution for easy system configuration and commissioning

- › Peace of mind

Easy monitoring of ZEAS unit by third party Building Management Systems through the use of our Modbus interface

ZEAS, the smart choice for medium and low temperature refrigeration

Operating range

Ambient temperatures: -20°C to +43 °C
Evaporating temperatures: -45°C to +10°C

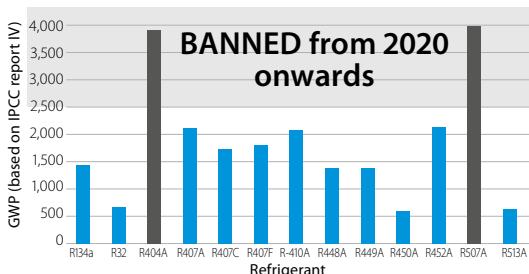

* $T_e = -35^\circ\text{C}$, $T_c = -10^\circ\text{C}$, 10 K SH, $T_{amb} = 32^\circ\text{C}$

* Only Zeas. Not applicable for Mini-Zeas and Multi-Zeas

Why R-410A?

R-410A is a lower GWP refrigerant (less than 2,500) than R404A and is fully F-gas compliant. It's future proof: it can be used even after 2030!

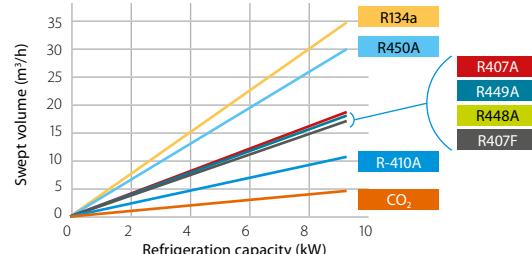

Use of refrigerant in refrigeration system with a refrigeration lower than 40 kW

Contributes to reducing installation cost and refrigerant charge

R-410A is a high pressure refrigerant which for the same swept volume can deliver much more refrigeration capacity than standard mid pressure and low pressure refrigerants.

Delivered capacity per used refrigerant

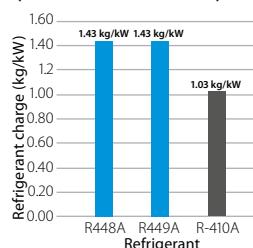

This means that for the same delivered refrigeration capacity we can use smaller components, thus reducing the installation cost and the amount of refrigerant charge in the system!

For a capacity of 8.4 kW
($T_e = -10^\circ\text{C}$ / $T_{amb} = 32^\circ\text{C}$)

Refrigerant	Suction piping diameter
R134a	1 1/8"
R407A	7/8"
R407F	7/8"
R448A	7/8"
R449A	7/8"
R450A	1 1/4"
R-410A	3/4"
CO ₂	1/2"

Refrigerant charge per used refrigerant
($T_e = -10^\circ\text{C}$ / $T_{amb} = 32^\circ\text{C}$)

R-410A is also:

- an easy to handle, common used refrigerant in the air conditioning world, therefore it is easy to find an installer which can work with this refrigerant, compared to CO₂, Ammonia and Propane.
- an A1 refrigerant, therefore no special safety measurements are required.

Mini-ZEAS condensing unit

Refrigeration solution for small food retailers

- › Inverter technology guarantees optimal food conservation by ensuring an accurate temperature and humidity control
- › The economized scroll contributes to a longer lifetime expectation of the refrigeration equipment and less maintenance requirement
- › The use of R-410A refrigerant allows the use of smaller piping diameters, thus reducing the refrigerant content in the system helping to lower our CO₂ footprint. R-410A is fully compliant with the latest F-Gas regulation and can be still used after 2020 and beyond
- › The DC economized compressor improves drastically the efficiency of the unit, thus helps lowering the energy bill!
- › Lowest sound level in the market down to 31 dBA. Sound level can be even further reduced thanks to the low noise modes
- › The weight of the unit is very low, therefore the unit can even be mounted on the wall
- › Up to 75% smaller than equivalent products in the market, ideal for those places where space is limited
- › Advanced software solution for easy system configuration and commissioning

ZEAS condensing unit for commercial refrigeration with scroll technology

Refrigeration solution for medium to large capacity applications featuring proven VRV technology

- One model for all applications from -45°C to 10°C evaporating temperature
- Perfect solution for all cooling and freezing applications with variable load conditions and high energy efficiency requirements. In particular used in supermarkets, cold storage, blast coolers and freezers etc.
- DC inverter scroll compressor with economiser function results in high energy efficiency and reliable performance
- Reduced CO₂ emissions thanks to the use of R-410A refrigerant and low energy consumption
- Factory tested and pre-programmed for quick and easy installation and commissioning
- VRV (Variable Refrigerant Volume) technology for flexible application range
- Increased installation flexibility thanks to limited dimensions
- Low sound level including „night mode“ operation
- For small freezing capacity, single ZEAS units can be connected to a booster unit
- Dedicated unit to allow multi combination of 2 x 15 HP or 2 x 20 HP resulting in less pipework or installation time

CO₂ Condensing units

CO₂ ZEAS refrigeration condensing unit

Refrigeration solution for various application featuring award winning swing technology with heat recovery to water possibility

- › Condensing units ideal for commercial and industrial applications with variable cooling capacity
- › Compressor controlled by inverter
- › Daikin swing compressor
- › Suitable for outdoor use in different climatic conditions
- › Wide range of capacities

More details and final information can be found by scanning or clicking the QR codes.

Compact CO₂ transcritical

Compact compressor racks fully equipped with gas cooler (CO₂) to generate cold both with CO₂ transcritical cycle

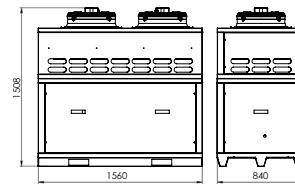

- › Double V battery (NV58 only).
- › Greater exchange surface that allows a lower refrigerant flow and charge.
- › A battery can act as an evaporator in case of heat demand and when cold generation is not required (optional rhx plus nv58).
- › Electrical panel with controller and disconnect switch with external control.
- › NV58 drivable EC fans.
- › Reduced footprint.
- › EPOXY resin treatment option for battery protection.
- › Two independent modules to contain the compressors and the gas cooler
- › Condenser with 5 mm tubes (high performance) and with low refrigerant charge.
- › VF on the first compressor of each group.
- › Gas cooler with EC fans and maximum pressure of 120 bar.
- › Optional: up to 1 exchanger (RHX or IHX).
- › It covers refrigeration services in one or two temperatures, working as a booster.
- › Design pressures:
 - MP (MT Suction): 52 bar.
 - LP (LT Suction): 30 bar.
 - IP (Receiv. and liquid line): 70 bar.
 - HP (Discharge): 120 bar.

Multi-compressor packs and racks

Compressor packs & racks

Multi compressor units

Standard configuration

Basic frame version:

- › Basic frame made from folded and painted steel sheet, screwed with bolts to make a basic structure to fix the components on it

Basic refrigeration system:

- › Each compressor is fitted with shut-off valves on suction line and discharge line
- › The compressors are fixed to the frame through rubber anti vibration supports
- › The oil system is through a oil separator, oil equalization is through a header fitted in the compressors oil sight glasses
- › According to the number of compressors fitted, there are one or two oil level indicators, fitted into the equalization header
- › The refrigerating system is equipped with liquid receiver, if the receiver is more than one, the installation is made in parallel with a safety valve; a dehydration cartridge filter, interchangeable, liquid level alarm, liquid sight glass and shut off valves
- › On suction line there is a mechanical cartridge filter, interchangeable

Options and accessories:

- › Mechanical oil equalization system
- › Electronic oil distribution system
- › Closed frame
- › Closed frame with simple sound proofing material
- › Closed frame with double layer sound proofing material
- › Anti-vibration supports
- › Oversized liquid receiver
- › Different voltage and/or frequency
- › EWCM 4180 Electronic card
- › XC1000D-EWCM9100 Electronic card

Standard features

- › Metal open frame with electrical switchboard
- › Compressor parallel with discharge and suction header
- › Liquid receiver
- › Liquid line
- › High and low pressure switch
- › Electrical switchboard complete with electronic control

Single Screw compressor

The single screw compressor consists of a main single screw and two gate rotors. They are designed for high capacities and optimal performances through the step less capacity control.

Compact CO₂ mini compressor racks

Mini compact compressor racks with less than 1 m² footprint, highly competitive, with CO₂ in transcritical cycle for cold generation

- › Highly accessible front opening door with hinges.
- › Lateral practicable door.
- › Vertical liquid receiver with exchanger prepared for connection to the emergency unit.
- › Practicable electrical panel with controller and complete wiring.
- › Compatible with Tewis remote management systems.
- › Adapted design for proper loading and transportation.
- › Up to 2 MT compressors and 1 LT compressor.
- › 360° access for easy maintenance.
- › Oil separator accumulator.
- › Two refrigerant level electronic sensors (high and low level).
- › Frequency inverter for the first MT compressor and optional for the LT compressor.
- › Optional frame for outdoor use.
- › 48l liquid receiver, with internal exchanger for connection to the emergency unit.
- › Optional connection to an external RHX. RHX can be installed on MT models.
- › Emergency unit not included (junctions included). Required power: 280 W @R134a Tev +5°C.
- › Selectable electronic brands: Tewis (EWCM9000pro), Danfoss (AK-PC 772) or Carel (pRack PR300T Medium).
- › Bitzer & Dorin compressors.
- › Design pressures:
 - MP (MT suction): 52 bar.
 - LP (LT suction): 30 bar.
 - IP (Receiver and liquid line): 70 bar.
 - HP (Discharge): 120 bar.

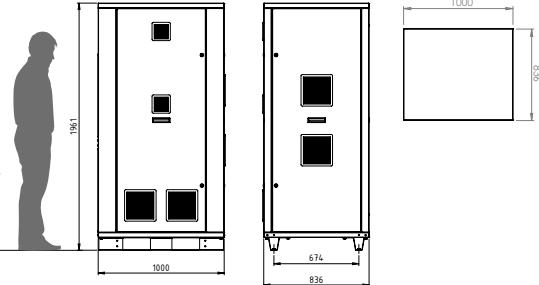

360° access, with lateral practicable door.

NS21

CO₂ compact compressor rack

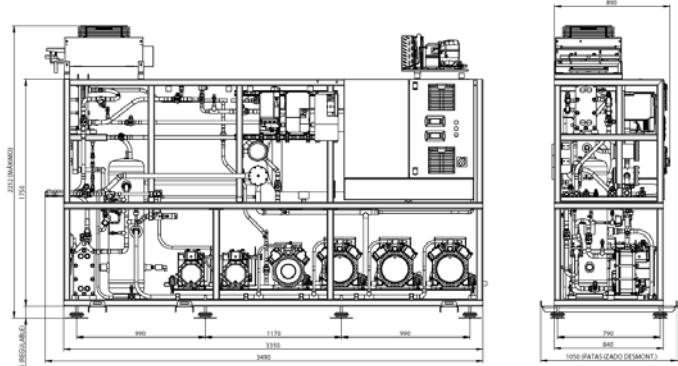

Compact compressor racks fully equipped for the generation of cold with CO₂ in transcritical cycle

- › Horizontal liquid receiver: 92/120/160 lit.
- › Tubular chassis.
- › Electrical panel located above the compressors.
- › Separator accumulator.
- › Up to 6 compressors.
- › Easy start-up and maintenance: all connections on the same side.
- › Reduced width of 790 mm that allows it to pass through any standard door.
- › Oil separator accumulator.
- › 92/120/160 l liquid receiver, with internal exchanger for connection to emergency unit.
- › Two electronic refrigerant level sensors (high and low levels).
- › Frequency inverter for the first MT compressor and optional for the LT compressor.
- › Selectable electronics brand: Tewis (EWCM9000pro), Danfoss (AK-PC 772 or 782) or Carel (pRack PR300T Medium or Large).
- › All copper connections.
- › Design pressures:
 - MP (MT suction): 52 bar.
 - LP (LT suction): 30 bar.
 - IP (Receiver and liquid line): 70 bar.
 - HP (Discharge): 120 bar.

Three different frame sizes available:

- › 4 compressors: lenght 1,900 mm
- › 5 compressors: lenght 2,650 mm
- › 6 compressors: lenght 3,350 mm

CO₂ compact compressor rack

Smart Duplex compressor racks offer the highest powers for the commercial refrigeration range with CO₂ at 2 temperatures

- › Profitability and energy savings.
- › 100% CO₂ = low environmental impact.
- › Compact and simple design (only 1m depth).
- › High capacity up to 9 compressors.
- › Vertical liquid receiver with high capacity (up to 2x250 l).
- › Extreme flexibility.
- › Remote control (accessible anywhere).
- › Easy commissioning and maintenance.
- › Possibility of 2 RHX, one for DHW and one for air conditioning.
- › Tubular chassis.
- › Oil separator accumulator.
- › High capacity liquid receiver (up to 2x250 l).
- › Up to 9 compressors.
- › Frequency inverter for MT & LT.
- › Two electronic sensors for refrigerant levels.
- › All copper connections.

Switchboard & electronic control

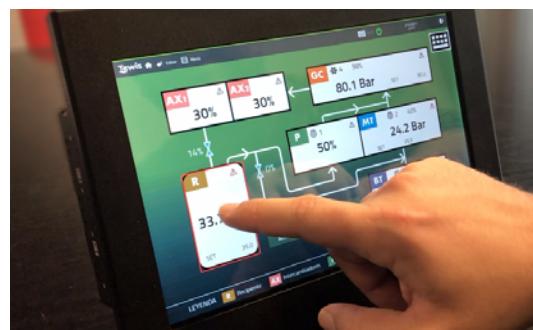

Switchboard

- › Bench-mounted switchboard, including complete wiring.
- › Power supply at 400V / 3F + N / 50Hz
- › Frequency inverter in the first compressor in sections BT, MT and parallel
- › Booster components and remote gas coolers electrically protected against overcurrents and short circuits.
- › Option: electrical connections of power supply to the auxiliary unit

Electronic control

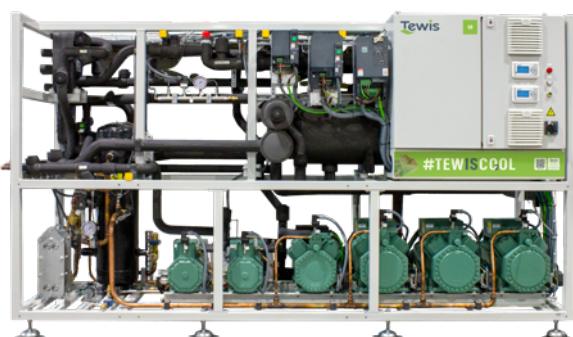

- › It represents the best option for transcritical and subcritical CO₂ solutions with Booster circuit and allows to manage up to two circuits for the recovery of heat.
- › Televis System compatible and open for the integration of Modbus RTU / TCP or BACnet MS / TP (optional) systems.
- › Touch screen with synoptic and real-time data.
- › Data logging and alarms.
- › Historical charts and data tables.
- › Parameter management.

Choose the better solution – with Tewis Full CO₂ refrigeration systems

Why do so many widely-known retail chains count on Tewis? Because Tewis offers a well-thought-out, complete range of efficient refrigeration systems. Especially when working with R-744 under high pressure, best quality solutions count double. Avoid problems – with Tewis features like full stainless steel piping or surprisingly intuitive control systems.

Service station (Ranst, Belgium) Conveni-Pack

Discover why a Belgian petrol station owner chose Daikin for its shop comfort and refrigeration needs.
www.youtube.com/DaikinEurope

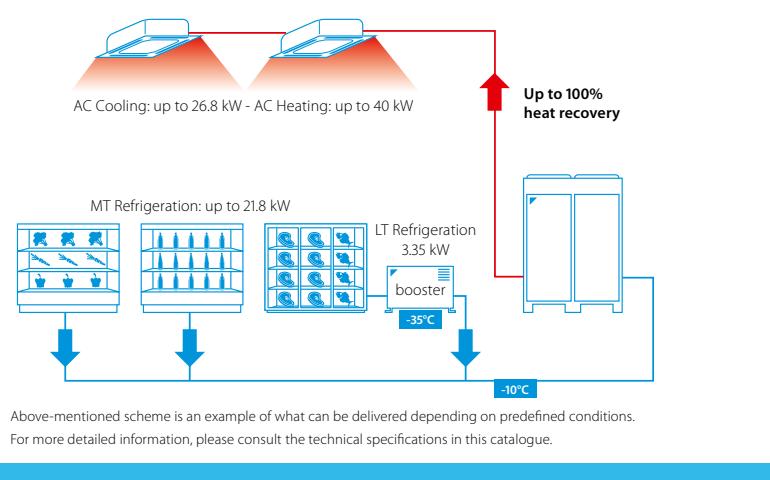

Conveni-Pack, integrated solution for commercial refrigeration, heating and air conditioning

Why choose Conveni-Pack?

Competition in the retail food sector is fierce. This does not just affect the income you can earn from sales - operating costs are also a determining factor for success.

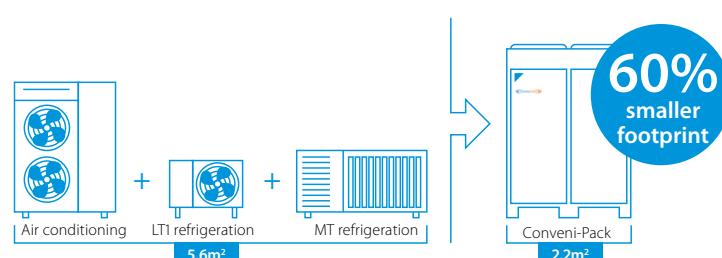

Energy efficient heat recovery system

- › Conveni-Pack recovers up to 100% of the heat extracted from supermarket refrigeration cases and re-uses it to heat the retail space and improve shop comfort at no additional cost (heat recovery system)
- › Savings of up to 50% on energy costs
- › Daikin inverter scroll compressor with economizer technology

Installing a compact solution

- › Easy to install, even in small spaces
- › Small footprint (up to 60% smaller footprint than conventional systems) and low weight
- › Reduced piping requirements
- › Minimal planning groundwork and lower assembly costs

Unique combination

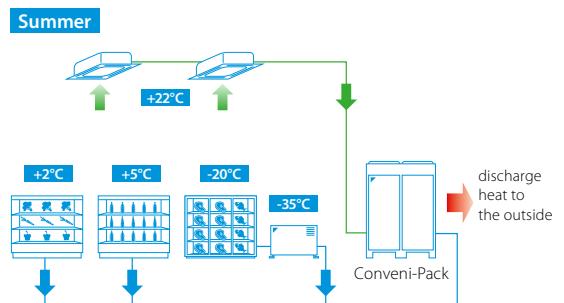

- › First mass-produced, whole-building system to combine medium and low refrigeration, heating, air conditioning in one circuit

Reliable operation

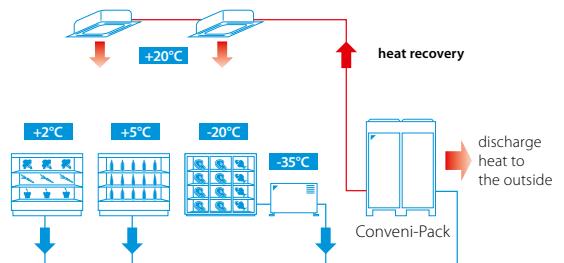

- › Error-proof component selection
- › Factory leak-tested and pre-charged

Year-round climate comfort

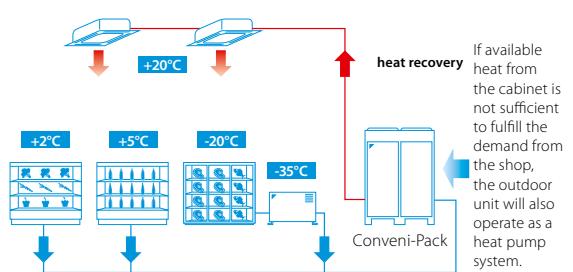

- › Quiet operation: Improved acoustics thanks to night operation mode, inverter control and inverter driven fans with optimised blades and grills
- › High grade sound insulation on both panels and compressors
- › Specially designed fan blades to limit sound emissions
- › 4 low sound operation settings including night mode
- › The heat recovered from refrigerated and freezer display cabinets can be used to provide heating for the shop.

Spring/Autumn

Winter

Internationally awarded

Winner of several awards* thanks to the innovating technology used and environmental friendly solution offered:

- › Winner of UK Environmental Product of the Year, Cooling Industry Awards - 2006
- › Winner of Incentive Prize, German Environment Ministry - 2007
- › Winner of the Innovation Trophy, equipmag (exhibition in France) - 2008
- › Winner of 2014 Institute of Refrigeration Ireland (IRI) Environmental award
- › Environmental Friendliness category of the Top Retail Product Awards 2014 in Germany

Benefits for installers/consultants

- › Integrated electrical & control box
- › Unit already pre-charged with refrigerant
- › Established VRV technology ensuring optimised installation and maintenance
- › Reduced delivery time thanks to European manufacturing plant
- › Flexible system for multiple applications
- › Connectable to all grocery refrigeration applications and supplied with a wide range of air conditioning indoor units to meet shop requirements
- › Outdoor units can be positioned up to 35m above or 10m below the indoor units
- › Piping length possible up to 130m
- › Suitable for indoor installation through the use of high ESP fans

Benefits for shop owners

- › Thought design for supermarkets and smaller retail outlets
- › Maximised retail sales space available as Conveni-Pack has a footprint up to 60% smaller than conventional grocery refrigeration systems
- › Reduced energy consumption by up to 50% through heat recovery
- › Quiet operation, thus ideal for densely populated urban areas

Reference

Edeka Buschkühle supermarket (Germany)

2 Conveni-Pack systems supply 32 meters of service counters, 12.5 meters of convenience fridges, one cooling storage room for fruit, an air curtain and 5 indoor units; the ZEAS system supplies two deep-freeze cabinets with a total capacity of 5 kW.

CO₂ Conveni-Pack

Why choose CO₂ Conveni-pack?

- DX Refrigeration, Heating & Space cooling by CO₂, for those whom demand a totally natural solution
- Heat recovery, and for those colder days automatic heat pump operation
- Fully assembled & packaged unit, providing low noise levels
- Mass produced in Daikin Europe's award winning factory
- Each unit is fully factory & run tested
- All units in stock, fast delivery
- Reduces annual energy consumption by up to 50%, compared to other manufacturers solutions.
- Hermetic swing compressor, complete with two stage compression, for lower running temperatures
- Oversized DC Brushless motor technology for improved reliability & efficiency
- Automatically balances refrigeration & space heating / cooling loads
- "Plug and Play" technology, reduced "On site" commissioning
- Optimized control logic for reliability and efficiencies
- Adaptable evaporation temperature control

Natural HVACR 4 life

Project for demonstration of innovative, integrated HVACR installations with natural refrigerant.

OBJECTIVES

- **Remove barriers** in the market for introducing integrated refrigeration and air conditioning systems that use natural refrigerants which have a lower Global Warming Potential.
- **Raise awareness** among installers, engineers, customers and general public on the potential of a combined air conditioning and refrigeration system that uses CO₂ as a natural refrigerant.
- **Contribute** to the implementation of the EU F-gas Directive.

ACTIONS

1. Demonstrate viability

- test prototype in **Belgium** that integrates air conditioning and refrigeration with heat recovery in real life settings;
- install, operate and monitor the new concept in European supermarkets, located in both temperate and warm climate zones (**Germany** and **Spain, respectively**)

2. Organise training sessions for installers and customers

3. Help update the definitions of standards and energy labelling schemes for multi-functional products by providing information on tested risk management, procedures regarding flammability and toxicity of natural refrigerants

4. Develop a cassette-type indoor unit using CO₂ that best provides comfort cooling and heating

5. Research the potential of cold storage for improving the Total Equivalent Warming Impact

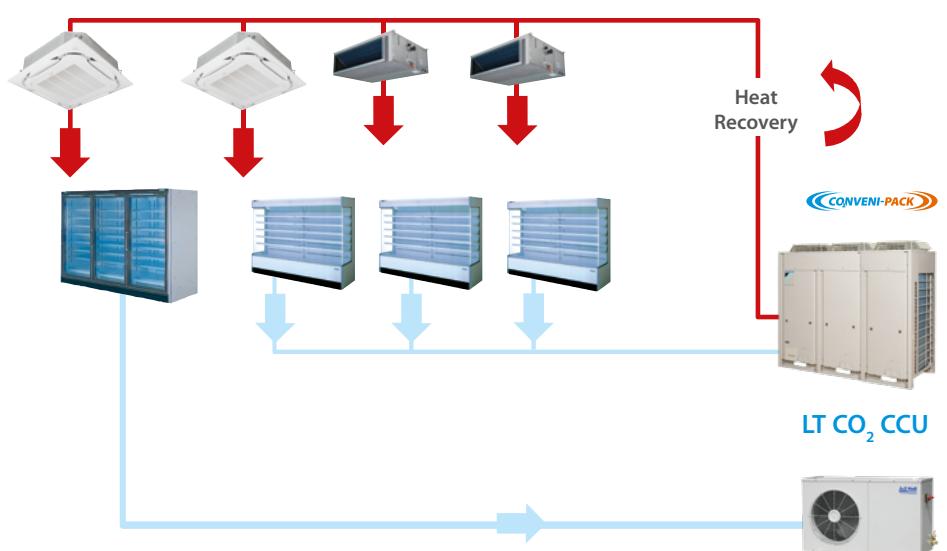

For more information refer to the website: naturalhvacr4life.eu

Low Temperature Showcases

Optional CO₂ CCU's are also available for Remote LT applications (not connected to Conveni-pack)

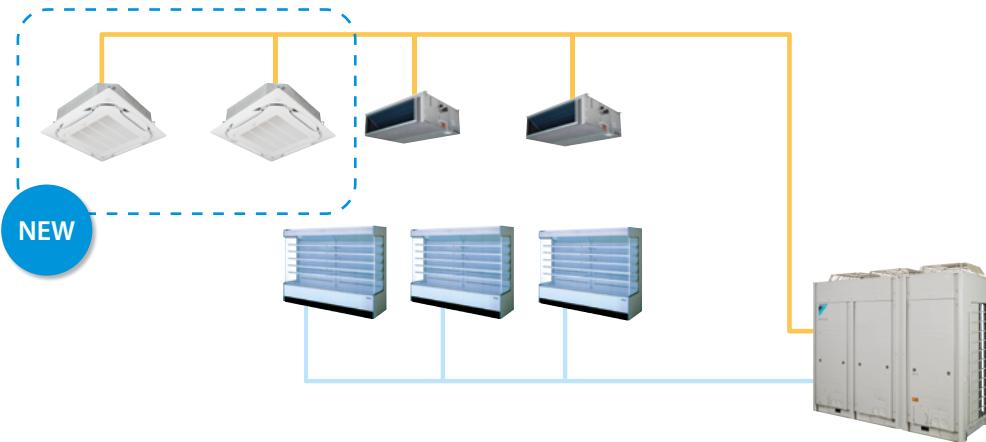

Plugin LT showcases with propane or LT condensing units with CO₂ are available to satisfy also freezer capacity needs.

CO₂ Conveni-Pack refrigeration system with heat recovery

Refrigeration solution for food retailers featuring award winning technology for heat recovery

- › Integrates high and low temperature refrigeration and air conditioning (including heating) into one system
- › By using heat recovery, optimised controls and state of the art compressor technology, Conveni-pack can reduce annual energy consumption up to 50% or more, compared to conventional systems
- › Lower associated CO₂ emissions thanks to the heat pump technology
- › Conveni-pack's modular design allows it to be used for smaller as well as larger shops
- › The modularity of the Conveni-pack system maximises installation flexibility. Outdoor units can be grouped into blocks or rows, or distributed around the building, to meet individual installation constraints
- › The heat extracted from the refrigeration showcases or evaporators can be re-used for comfort heating of the shop at no extra cost
- › Low sound level including „night mode“ operation

CO₂ Round Flow Cassette

360° air discharge for optimum efficiency and comfort

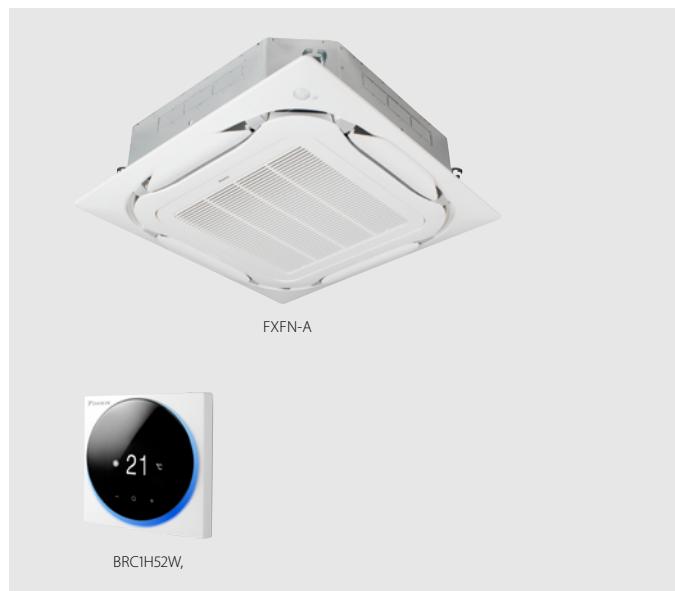

- › Automatic filter cleaning results in higher efficiency & comfort and lower maintenance costs.
- › Two optional intelligent sensors improve energy efficiency and comfort
- › Widest choice ever in decoration panels: designer panels in white (RAL9010) and black (RAL9005) and standard panels in white (RAL9010) with grey louvers or full white
- › Bigger flaps and unique swing pattern improve equal air distribution
- › Individual flap control: flexibility to suit every room layout without changing the location of the unit!
- › Lowest installation height in the market: 214mm for class 20-63
- › Optional fresh air intake
- › Branch duct discharge allows to optimize air distribution in irregular shaped rooms or to supply air to small adjacent rooms

- › Standard drain pump with 675mm lift increases flexibility and installation speed

More details and final information can be found by scanning or clicking the QR codes.

Round flow cassette panel (7 types)

Concealed ceiling unit with medium ESP for CO₂ Conveni-pack

To respond to all shop requirements for comfort cooling and heating, a wide range of air conditioning indoor units are available

- > Slimmest unit in class, only 245mm (300mm built-in height) and therefore narrow ceiling voids are no longer a challenge

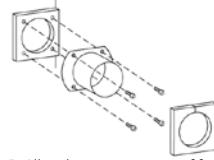

- > Medium external static pressure up to 150Pa facilitates using flexible ducts of varying lengths
- > Possibility to change ESP via wired remote control allows optimisation of the supply air volume
- > Discretely concealed in the wall: only the suction and discharge grilles are visible
- > Multi zoning kit allows multiple individually-controlled climate zones to be served by one indoor unit
- > Reduced energy consumption thanks to specially developed DC fan motor and drain pump
- > Optional fresh air intake

Fresh air intake opening in casing

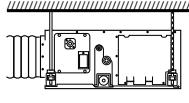

Optional fresh air intake kit

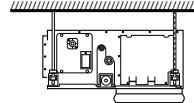

* Brings in up to 10% of fresh air into the room

* Allow larger quantities of fresh air to be brought in

- > Flexible installation: air suction direction can be altered from rear to bottom suction and choice between free use or connection to optional suction grilles

For free use into a false ceiling

For connecting onto a suction canvas
(not supplied by Daikin)

Contains fluorinated greenhouse gases

- > Standard built-in drain pump with 625mm lift increases flexibility and installation speed

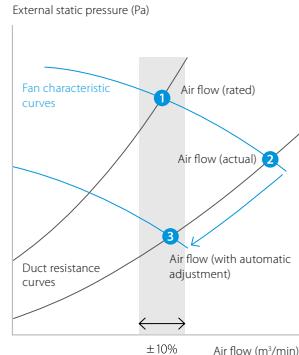

Automatic Airflow Adjustment function

Automatically selects the most appropriate fan curve to achieve the units' nominal air flow within ±10%

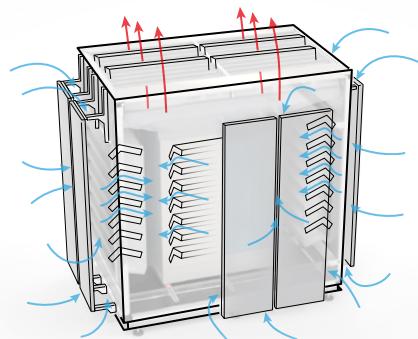

Why?

After installation the real ducting will frequently differ from the initially calculated air flow resistance * the real air flow may be much lower or higher than nominal, leading to a lack of capacity or uncomfortable air temperature. Automatic Airflow Adjustment function will adapt the unit's fan speed to any ducting automatically (10 or more fan curves are available on every model), making installation much faster

Acoustic solution for Conveni-pack

- > Complete & professional housing solution, series KVD specially designed for Daikin CVP units
- > Stable and storm proof construction, tested and verified by TÜV Austria
- > Extremely low static pressure drop, measured by TÜV Austria
- > Highest soundproofing values thanks to multi-layered sound insulation
- > Already assembled ex works -> ensures very quick installation of the outdoor unit
- > Base frame made of steel-profiles, insulated bottom and drain pan are standard
- > Housing can be modified for an even higher dampening with additional deflection plates and hoods

(2) total pressure drop at maximum air-flow

Acoustic solution for Conveni-Pack

- › Solflex acoustic solutions have been developed to reduce the sound emissions of outdoor units without limiting functionality.
- › Nominal sound reduction measured according to DIN EN ISO 3744 by a renomated and independent laboratory.
- › Exterior surfaces are standard available in RAL7016 anthracite grey, RAL9006 white aluminium, RAL9010 pure white or in galvanised steel.
- › Online technical data and configuration including sound evaluation to norm accepted by many authorities to obtain building permission.
- › On demand custom made acoustic solutions with site assistance including installation for large scale projects.
- › Very large variety of standard acoustic solutions available for all type of HVACR units.

R-410A Conveni-Pack refrigeration system with heat recovery

Refrigeration solution for food retailers featuring award winning technology for heat recovery

- › Integrates high and low temperature refrigeration and air conditioning (including heating) into one system
- › By using heat recovery, optimised controls and state of the art compressor technology, Conveni-pack can reduce annual energy consumption up to 50% or more, compared to conventional systems
- › Lower associated CO₂ emissions thanks to the heat pump technology
- › Conveni-pack's modular design allows it to be used for smaller as well as larger shops
- › The modularity of the Conveni-pack system maximises installation flexibility. Outdoor units can be grouped into blocks or rows, or distributed around the building, to meet individual installation constraints
- › The heat extracted from the refrigeration showcases or evaporators can be re-used for comfort heating of the shop at no extra cost
- › Low sound level including „night mode“ operation

More details and final information can be found by scanning or clicking the QR codes.

LRYEQ-AY

LRYEQ16AY

Conveni pack, in combination with a ZEAS unit.

This store was nominated by spar as its 'local supermarket of the year', thanks in part to its owner's strategic investment in a key department: Refrigeration.

By installing a Conveni pack in combination with Zeas, it was possible to **save around €10,000 on energy costs each year**, from money that would otherwise have spent on heating. **SPAR, Supermarket.**

Booster unit for R-410A

- › A booster unit allows to connect freezer showcases / rooms to ZEAS and Conveni-Pack outdoor units
- › Reduced piping requirements, from 4 to 2 pipes, compared to a conventional system
- › Low sound mode available reducing sound emissions significantly without giving in on Refrigerating capacity

Evaporators

Evaporators with or without TEV for different operations and refrigerants

General features:

- › Capacity for LT/MT cooling: 0.5 to 213 kW
- › Ambient/cooling room temperature range: - 40°C - +25°C
- › Refrigerants: R134A a, R 449A, R448A, R452A R407F, R 407A
- › Fin distance: from 3 mm to 11 mm
- › Fin materials: Al
- › Tube materials: Cu
- › Conditions:
 - MT: Ambient temperature: 35°C Evp. Temperature: -10°C
 - LT: Ambient temperature: 35°C Evp. Temperature: -35°C

Options:

- › Electric defrost heating
- › Hot gas defrost
- › Drain pan heating
- › Fan ring heater
- › High efficient EC fans
- › Wiring on terminal box
- › Included valves and regulation
- › Fin materials AISI 304, AISI 316
- › Tube materials AISI 304, AISI 316
- › Casing in stainless steel (Inox)

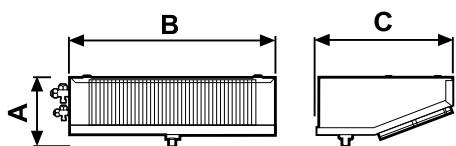

Types:

- › flat evaporator
- › double flow
- › cubic design
- › Evaporator only
- › Evaporator + EEV/TEV
- › Evaporator + EEV/TEV + electronic controller

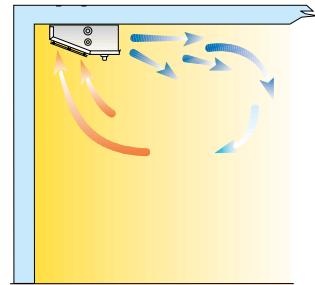

For technical selection, prices, accessories and delivery time please use the Zanotti software and contact our technical department. We are happy to help you.

** In cold areas, provide a drain pan heater (field supply) to prevent drained water from freezing up in the drain pan *** required for each module

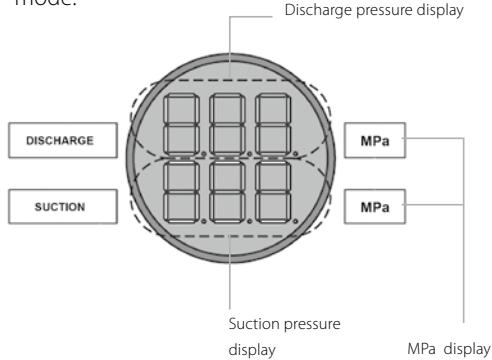

**** software update required (to be executed during commissioning) ***** mandatory

Digital pressure gauge kit

BHGP26A1

The digital measurement display allows you to diagnose a unit at a glance and it can be used with all ZEAS and R-410A Conveni-Pack systems.

- › Digital measurement display for fixed installation or service applications.
- › Displays high and low pressure.
- › Displays error codes in the event of a fault.
- › Displays up to 32 operating parameters.
- › Displays error code history (last three).
- › Scrolls and stores output values.
- › Automatically returns to normal operating display mode.

Modbus communication kit

BRR9A1V1

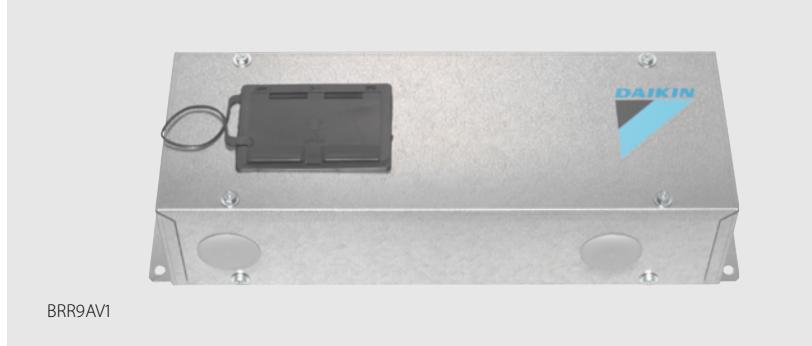

The Daikin Modbus Communication Interface lets you fully integrate Daikin ZEAS and Daikin R-410A Conveni-Pack systems with building control automation networks and other monitoring systems.

The interface allows you to read all the operational parameters and control important values using the Modbus protocol. This unifying component transforms ZEAS and Conveni-Pack into a transparent, customisable refrigeration unit and means that you can create object-specific and energy-optimised shop concepts, including remote monitoring application.

Pro interfaces can be used to connect up to 32 ZEAS units, and are also suitable for use with R-410A Conveni-Pack systems and the Booster.

Control values

- › Target evaporation temperature
- › Low pressure level for on and off points
- › Forced stop
- › Error messages can be cancelled remotely

Display values

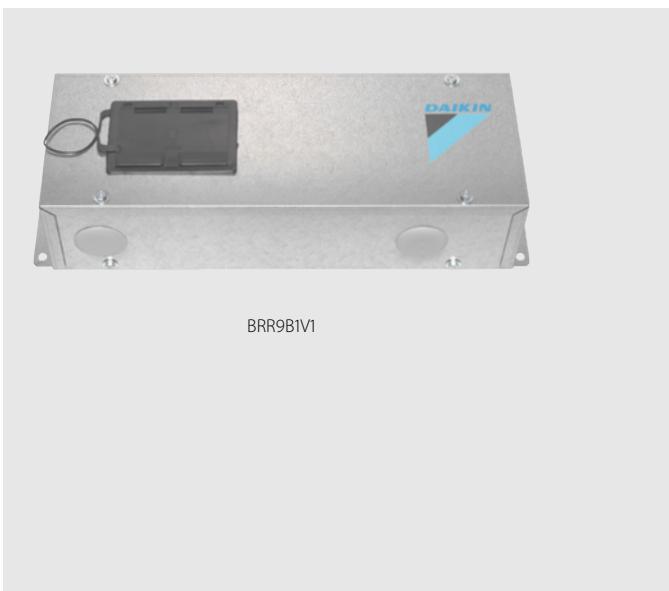

- › Model information and operating status
- › Refrigerant operating pressure and temperatures
- › Electrical operating data and temperatures for components
- › Target values
- › Fan stage and compressor frequency, operating hours
- › Warning and error messages as well as system safety functions

Modbus communication kit

The Daikin Modbus Communication Interface lets you fully integrate Daikin ZEAS and Daikin CO₂ Conveni-Pack systems with building control automation networks and other monitoring systems.

The interface allows you to read all the operational parameters and control important values using the Modbus protocol on refrigeration and comfort side. This unifying component transforms CO₂ Conveni-Pack into a transparent, customisable refrigeration unit and means that you can create object-specific and energy-optimised shop concepts, including remote monitoring application.

Pro interfaces can be used to connect up to 7 CO₂ Conveni-Pack units.

Transport Refrigeration

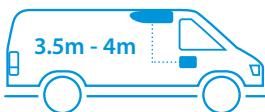

Product Portfolio

Our transport refrigeration unit range offers reliable and efficient solutions for a wide range of applications and vehicle types. Each unit is designed to minimize your total cost of ownership, configured to your exact needs, manufactured to Daikin's rigorous quality standards, and supported with a service network available 24/7.

Invisible Direct-Drive

SFZ007 | SFZ008 | SFZ009 | SFZ009 Multi

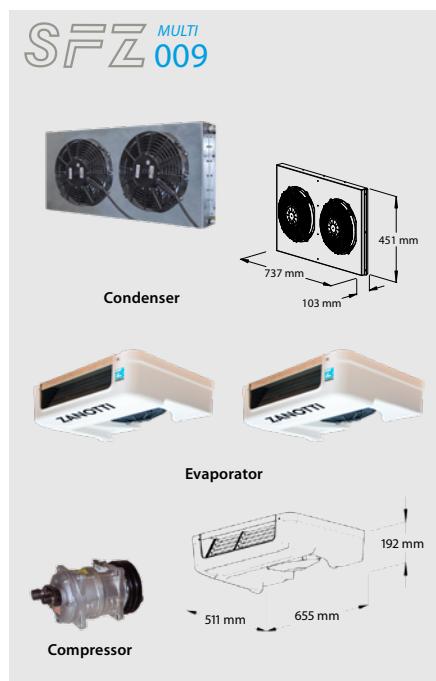

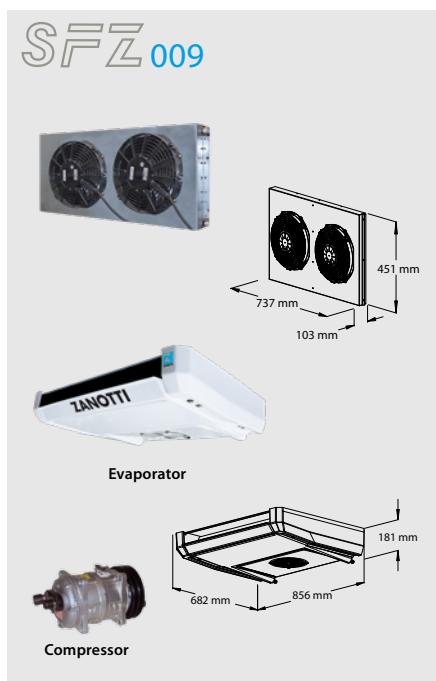

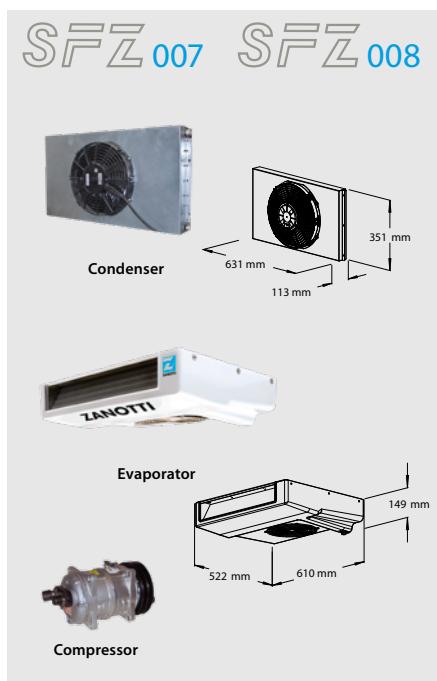

Our Invisible range is designed for discreet and efficient transportation of refrigerated products in vans. These units are installed underneath the vehicle chassis, completely invisible from the outside, preserving the aesthetics, original height and aerodynamics of the vehicle, while reducing bodywork. SFZ007, SFZ008 and SFZ009 offer varying refrigeration capacities and volume ratings tuned for different applications. SFZ009 Multi features dual evaporators to enable products with different temperature requirements to be transported in two separate zones.

The Invisible range, with its ultra-thin dimensions make it the ideal choice for customers who need a space-saving solution. A driver-friendly interface in the cabin allows real-time monitoring and control of the unit performance to ensure the cargo is maintained at precisely the right temperature throughout the trip.

Key Features:

- Multiple temperature zones in the same vehicle (Multi model only)
- Powered by direct-drive on road, electric grid on stand-by
- Vehicle access to tight underground areas
- Under-chassis mounting preserves vehicle aesthetics and aerodynamics
- Invisible from the outside
- Low noise
- User-friendly cabin driver interface
- Telematics-compatible
- 2-year standard warranty

Provisional engineering data

Zero Direct-Drive

Z200 | Z250 | Z350 | Z380

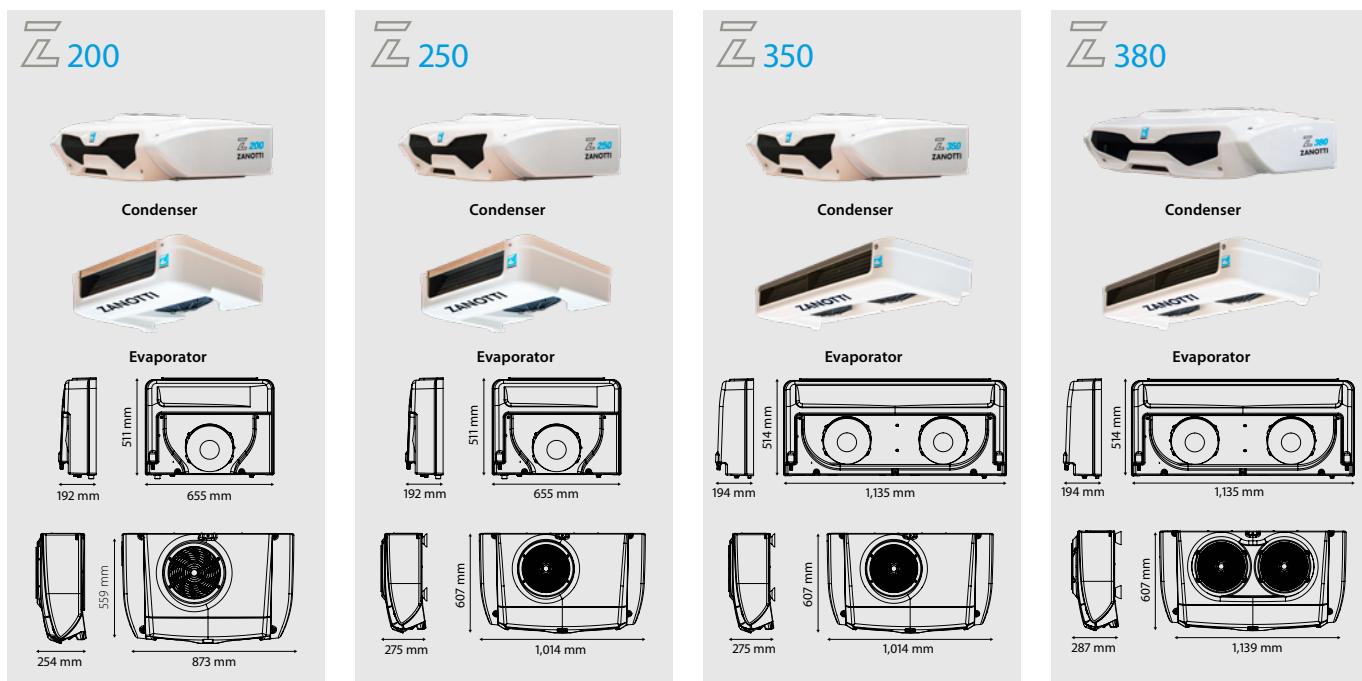

The Zero range meets the needs of the distribution industry by offering the utmost flexibility in the temperature management of refrigerated products. The extensive direct-drive Zero line-up including Z200, Z250, Z350, and Z380 is designed to meet a wide range of applications in light commercial vehicles.

All Zero models provide easy installation and serviceability. The condensing unit can be mounted on the roof or the front wall of the box, and the ultra-thin evaporator installed in the cargo compartment maximizes cargo volume. A driver-friendly interface in the cabin allows real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip. Our Zero units are setting new standards with their attractive design.

Key Features:

- Proven reliability and performance
- Powered by direct-drive on road, electric grid on stand-by
- Easy to install and service with removable side panels
- Configurable for a wide range of refrigerated applications in light commercial vehicles
- Low noise
- User-friendly cabin driver interface
- Reduced refrigerant charge and maintenance costs
- Telematics-compatible
- 2-year standard warranty

Vehicle voltages available: 12VDC

Zero Direct-Drive Multi-Temp

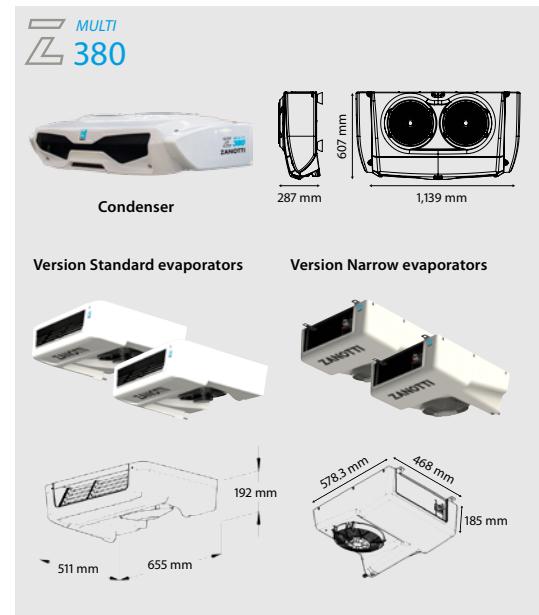

Z380 Multi

Z380 Multi and Z380 Multi (Narrow Evap) models are designed to meet the modern needs of low environmental impact refrigeration for light commercial vehicles. These units feature additional evaporators to enable transport of products with different temperature requirements in separate zones, available in multiple configurations to adapt to a wide range of applications.

All Zero models provide easy installation and serviceability. The condensing unit can be mounted on the roof or the front wall of the box, and the ultra-thin evaporator installed in the cargo compartment maximizes cargo volume. A driver-friendly interface in the cabin allows real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip. Our Zero units are setting new standards with their attractive design.

Key Features:

- Multiple temperature zones in the same vehicle
- Proven reliability and performance
- Powered by direct-drive on road, electric grid on stand-by
- Easy to install and service with removable side panels
- Configurable for a wide range of refrigerated applications in light commercial vehicles
- Low noise
- User-friendly cabin driver interface
- Reduced refrigerant charge and maintenance costs
- Telematics-compatible
- 2-year standard warranty

Van Electric

Invisible Electric

SFZ009e | SFZ009e Multi

The Invisible Electric range is designed for discreet and efficient transportation of refrigerated products in vans on electric power, both on road and during stand-by. A highly reliable battery-inverter package supplies the power, making the Invisible Electric an ideal choice for full-electric, hybrid, or conventional vehicles.

These units are installed underneath the vehicle chassis, completely invisible from the outside, preserving the aesthetics, original height and aerodynamics of the vehicle, while reducing bodywork. SFZ009e offers varying refrigeration capacities and volume ratings tuned for different applications. SFZ009e Multi features dual evaporators to enable products with different temperature requirements to be transported in two separate zones.

The Invisible range, with its ultra-thin dimensions make it the ideal choice for customers who need a space-saving solution. A driver-friendly interface in the cabin allows real-time monitoring and control of the unit performance to ensure the cargo is maintained at precisely the right temperature throughout the trip.

Key Features:

- Zero emissions
- Powered by reliable battery-inverter pack on road, chargeable on electric grid
- Compatible with full-electric, hybrid or conventional vehicles
- Multiple temperature zones in the same vehicle (Multi model only)
- Vehicle access to tight underground areas
- Under-chassis mounting preserves vehicle aesthetics and aerodynamics
- Invisible from the outside
- Low noise
- User-friendly cabin driver interface
- Telematics-compatible
- 2-year standard warranty

Provisional engineering data

Zero Electric

Z120b

Z120b is powered by the vehicle battery, with minimal environmental impact and maximum cooling effectiveness ideal for refrigerated transport in vans. The unit can be installed quickly without any mechanical couplings with the vehicle engine, which also minimises power draw and thus emissions.

All Zero models provide easy installation and serviceability. The condensing unit can be mounted on the roof or the front wall of the box, and the ultra-thin evaporator installed in the cargo compartment maximizes cargo volume. A driver-friendly interface in the cabin allows real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip.

Key Features:

- Low emissions
- Proven reliability and performance
- Powered by vehicle battery on road, electric grid on stand-by
- Compatible with full-electric, hybrid or conventional vehicles
- Easy to install and service with removable side panels
- Low noise
- User-friendly cabin driver interface
- Reduced refrigerant charge and maintenance costs
- Telematics-compatible
- 2-year standard warranty, extendable up to 5 years

Electric Power Supply

Our power supply packages are designed to match our Invisible Electric and Zero Electric ranges, providing a high level of reliability and customization for the specific vehicle and application needs.

The power supply can be configured as one or two DC lithium-ion batteries, each providing 1.25 to 5.5kW, up to 11kW total; and comes with a robust inverter battery charger.

Key Features:

- Zero emissions
- Zero maintenance
- Automotive-grade design with high reliability
- Long life with 3,500 cycles
- Fast charging
- 230VAC power for charging and stand-by operation
- Bluetooth connection with smartphone app
- Compatible with telematics, for remote battery monitoring
- Optional connection to vehicle DC battery for supplementary power supply
- Optional auxiliary input for external power supply

Zero Electric

Z200e | Z250e | Z350e | Z350e Multi

The Zero range meets the needs of the distribution industry by offering the utmost flexibility in the temperature management of refrigerated products. Zero Electric is designed to meet a wide range of applications in light commercial vehicles on electric power, both on road and during stand-by. A highly reliable battery-inverter package supplies the power, making Zero Electric an ideal choice for full-electric, hybrid, or conventional vehicles.

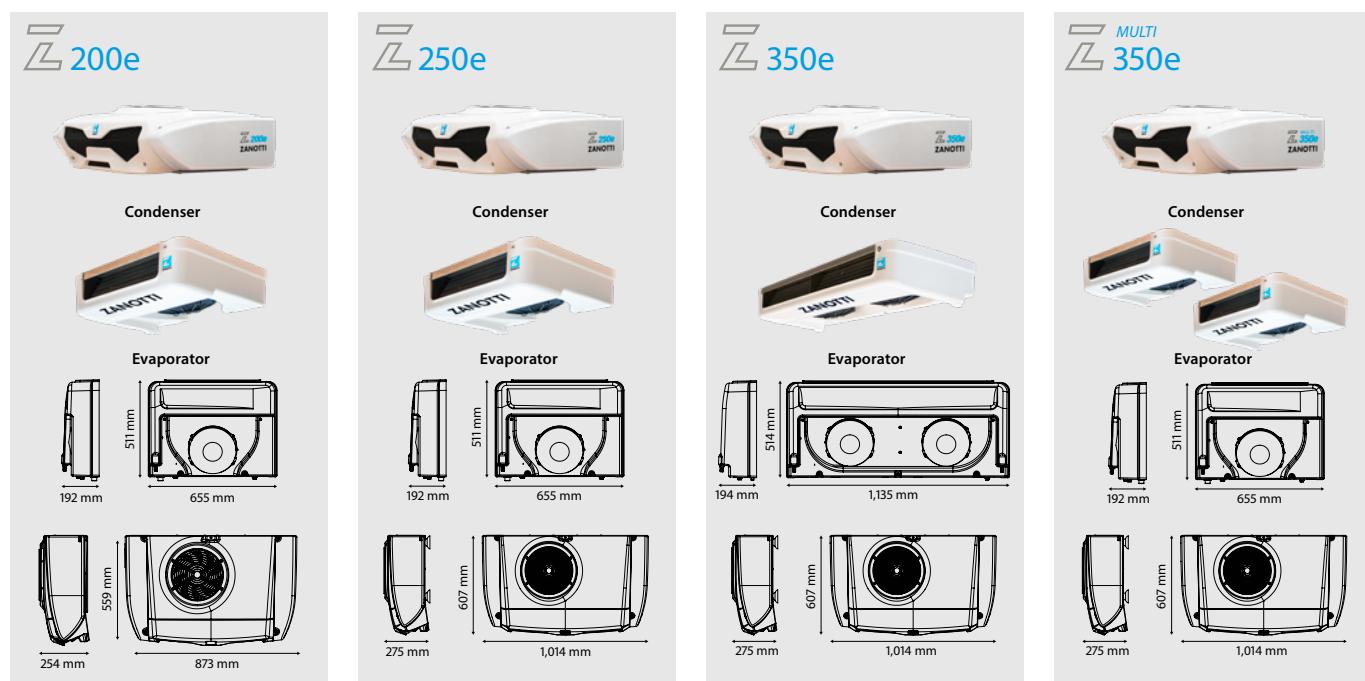

Z200e, Z250e and Z350e offer varying refrigeration capacities and volume ratings tuned for different applications. Z350e Multi features additional evaporators to enable transport of products with different temperature requirements in separate zones.

All Zero models provide easy installation and serviceability. The condensing unit can be installed as top-mount on the roof of the box or nose-mount on the front wall of the box, and the ultra-thin evaporator installed in the cargo compartment maximizes cargo volume. A driver-friendly interface in the cabin allows real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip. Our Zero units are setting new standards with their attractive design.

Key Features:

Light Truck

SFZ

SFZ238 | SFZ248

SFZ is a robust direct-drive solution for refrigerated transport on light to medium trucks. It is a proven design optimized for energy-efficiency, low noise, and easy-to-service transport of temperature-controlled goods in medium sized boxes.

SFZ238 and SFZ248 are designed as nose-mount, installed on the front wall of the box, with multiple configurations of evaporators and fans to meet the requirements of a wide range of vehicle types and applications. A driver-friendly interface in the cabin allows real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip.

Key Features:

- Proven reliability and performance
- Powered by direct-drive on road, electric grid on stand-by
- Easy to install and service, light weight
- Low noise
- Configurable for a wide range of refrigerated applications in light to medium trucks
- User-friendly cabin driver interface

Truck

Uno

U600 | U800 | U1000

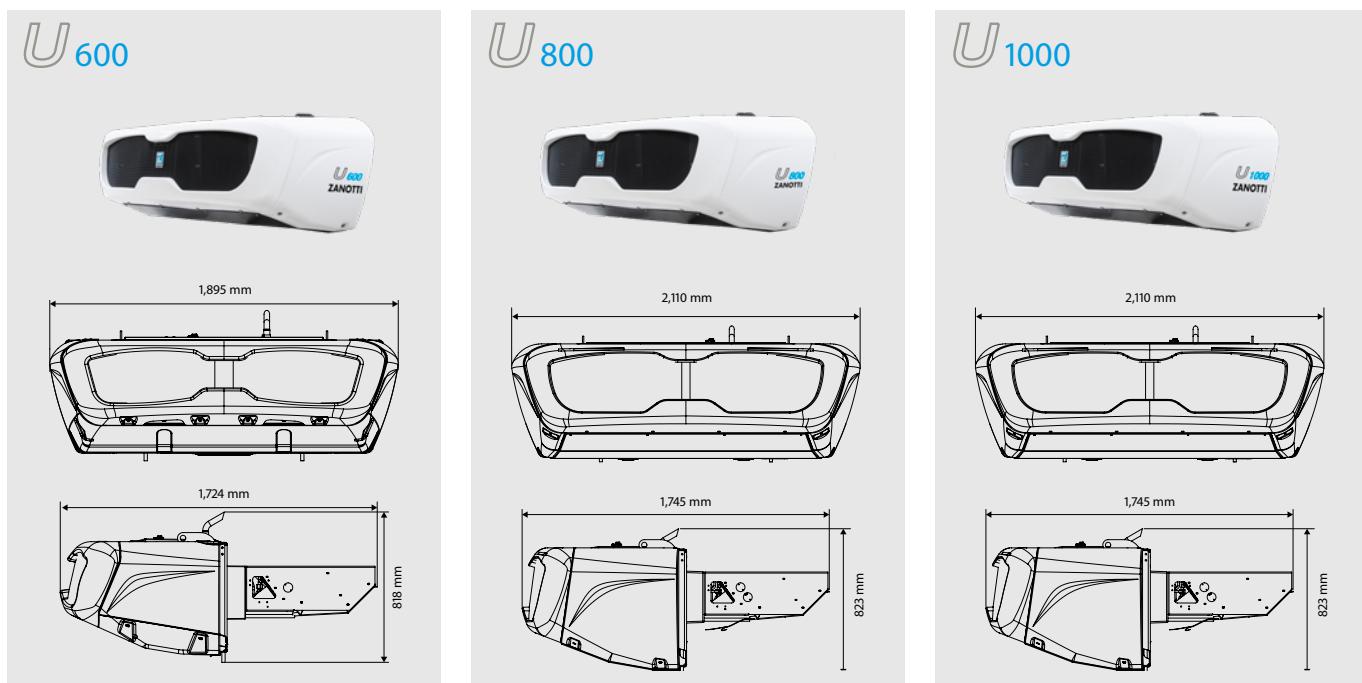

The redesigned Uno range of units are independently powered with a diesel engine, and available in various capacities to efficiently transport temperature-controlled products in medium to heavy trucks. The Uno features Zanotti's innovative direct coupling design between the engine and the compressor, and utilize Daikin's expertise in design for reliability and performance. Their high cooling performance, energy efficiency and extended maintenance intervals minimise the total cost of ownership, while meeting the most stringent emission, material waste, and noise pollution regulations.

U600, U800, and U1000 are designed as nose-mount, installed on the front wall of the box. The electronics enabled advanced diagnostics and two-way telematics including remote monitoring and control. A robust interface in the cabin can be installed in the vehicle DIN slot or mounted on the dash, allowing real-time monitoring and control of unit performance to ensure goods are maintained at precisely the right temperature throughout the trip.

Key Features:

- Designed for high reliability with a custom Yanmar engine
- Innovative powertrain design enabling high performance and energy efficiency
- Reduced fuel consumption and noise
- Extended maintenance intervals
- All-new electronics compatible with two-way telematics
- 2-year standard warranty

 Provisional engineering data

Trailer

Exigo E1500

Daikin Exigo E1500 is the reflection of our legacy in innovation, reliability, and transport refrigeration expertise.

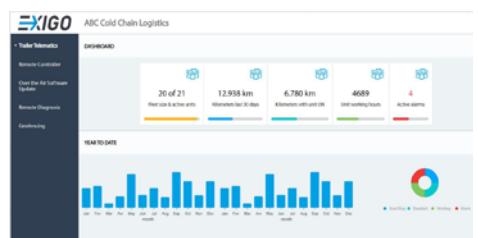

E1500 is the pinnacle of diesel-powered refrigeration, built on an electric-ready platform.

Exigo offers minimum total cost of ownership and maximum peace of mind

- › Full variable speed achieving lower fuel consumption than fixed speed units
- › Electric architecture providing 15kW true capacity both on the road and the grid
- › Highest cooling power of the category in frozen applications
- › Ease of unit operation with high resolution graphical user interface
- › Ease of fleet management via advanced telematics, compatible across platforms
- › Daikin components with proven reliability and lightweight design (over 100kg lighter)
- › Low-noise as standard, PIEK available
- › Reduced maintenance downtime with 3,000h service interval as standard
- › 2-year warranty, telematics and maintenance coverage included as standard
- › EMEA sales and service network backed by Daikin

High resolution graphical user interface

Advanced telematics included as standard

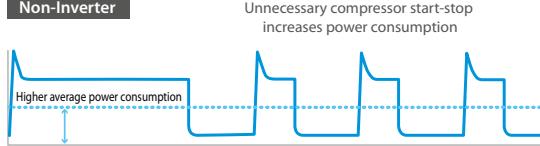

EXIGO

INVERTER

Reduced average power consumption

Non-Inverter

Inverter reduces power and fuel consumption by eliminating unnecessary compressor start-stop

Services

Service Network

Our continuously growing European service network, extending to over 200 authorized service partners, enabled by Daikin to provide repair and maintenance services for our van, truck, and trailer units. Our service partners always apply our genuine spare parts, engineered to ensure maximum performance and reliability. Utilising the authorized service partners and genuine parts is the only way to protect your investment under Daikin warranty and minimise total cost of ownership.

Service Contracts

Our vision in Daikin Transport Refrigeration is to support the entire lifecycle of our customers' products. All our transport refrigeration units come standard with a two-year warranty. With the launch of Daikin Exigo trailer refrigeration unit, we are introducing the following additional service contracts.

Maintenance Plan

Exigo comes standard with a two-year maintenance plan, covering the scheduled service intervals at national service providers. After the first two years, the contract is renewable on an annual basis.

Extended Warranty

Exigo international parts & labor warranty can be extended on an annual basis after the first two years of standard warranty. The Extended Warranty contract requires Telematics and Maintenance Plan to be also selected.

24/7 Breakdown Support

Our European call center will help arrange breakdown service regardless of time, location or language. This service is also included as standard for the first two years, renewable annually.

Stand By Me

Exigo customers will have access to the Daikin Stand By Me portal which simplifies contract management and renewal for fleet managers.

Telematics

Daikin Telematics help trailer fleet managers gain greater insight and control over their fleet remotely. The back-end of our system is supported by an EU-based provider highly experienced in commercial vehicle telematics providing connectivity across EMEA. Exigo comes standard with two-year telematics and renewable annually afterwards.

The telematics framework is designed with the customer in mind, providing utmost flexibility by being configurable for third-party fleet management software. The included telematics portal provides state-of-the-art visibility and control of each unit in the fleet.

- Live location monitoring on map
- Remote HMI display and control
- Error messages with push notification
- Geofence alarm and low-noise programming
- Remote unit diagnostics
- Over-the-air software update
- Intuitive online fleet management portal
- Configurable for existing fleet management software
